Tear resistant	✓	✗
Reduces dust - cleaner to transport	✓	✗
Recyclable and biodegradable	✓	✗
No product leakage - less waste	✓	✗
Cleaner to handle	✓	✗
And all for the same price	✓	✓

Three of Westbuild's most popular products are now available in our unique Dry As A Bone rainproof bags.

Kwikset Concrete™, Concrete40™ and General Purpose Concrete now come in bags that are rainproof which means lots of benefits for you and your customers.

And all for the same price!

That's right! Products packed in Dry As A Bone rainproof bags will cost no more than when they were packed in paper bags.

Rainproof

The new polyethylene (PE) packaging is waterproof and can be stored outside, saving you valuable indoor storage space.

Patented seal

The use of a patented Labyrinth Seal ensures that Westbuild's new packaging is impervious to water and unaffected by rain.

Recyclable

Westbuild's new polyethylene (PE) bag is easier to recycle than traditional Dry-Mix concrete bags which are made from paper lined with plastic.

Old paper bags

New rainproof bags
